

Rocking Couch

by Michael Winter

Construct your own Rocking Couch using the offered files.
Current size: width = 92 cm, height = 52 cm, length = 210 cm
This size fits perfect for 2 people with a height of about 1.80 meters. Change the dimensions if required.

I have chosen those materials:

- waterproof multiplex panel for the two shapes below
- lacquered multiplex panel for the 84 colored slats
- screws (stainless steel)

But there are a lot of alternatives.

I am not responsible for any damage resulting from building or using the Rocking Couch.
